RESPONSE TO RESTRICTION REQUIREMENT DATED JULY 26, 2002

Commissioner for Patents
Washington, D.C. 20231

Sir:

This paper is submitted in response to the Restriction Requirement dated July 26, 2002, for which the date for response is August 26, 2002. Reconsideration of the application is respectfully requested.

Applicants respectfully traverse the restriction requirement and submit that, because the restricted claims recite a common osmoprotectant and water use strategy, a common search would not be burdensome or out of the ordinary. Regardless, applicants provisionally elect the subject matter of Group I comprising original claims 59 to 63. Applicants also request entry of the Preliminary Amendment filed concurrently herewith to claim 64 and claim 82, whereby these amendments are made to reference elected claim 59. As these claims would now be linked,

reconsideration of the restriction requirement and concurrent examination of Groups II and III with Group I is respectfully requested.

No fees are believed due in connection with the filing of the instant paper. However, should any such fees become due, consider this paragraph a request and authorization to withdraw the appropriate fee under 37 C.F.R. §§ 1.16 to 1.21 from Fulbright & Jaworski L.L.P. Account No.: 50-1212/10201614/10056. The Examiner is invited to contact the undersigned Attorney at (512) 536-3085 with any questions, comments or suggestions relating to the referenced patent application.

Respectfully submitted,

Robert E. Hanson

PRELIMINARY AMENDMENT

Hon. Commissioner for Patents
Washington, D.C. 20231

Sir:

Please amend the application as indicated below.

In the Claims:

Please amend claims 64 and 82 as follows:

- B1
64. (Amended) A method for producing the plant of claim 59 comprising:
- (a) introducing into cells of a monocot plant an expression cassette comprising a preselected first DNA segment encoding an enzyme which catalyzes the synthesis of the osmoprotectant proline, operably linked to a promoter functional in the monocot plant cells, to yield transformed monocot plant cells; and
 - (b) expressing the enzyme encoded by the preselected first DNA segment in the transformed monocot plant cells so as to render the transformed monocot plant cells substantially water stress tolerant or resistant.
